

Practice Final Exam

Download and unzip the **Canada.gdb.zip** geodatabase file from:
http://dverbyla.net/nrm338/final_exam_data

All geoprocessing output should be to your *Canada.gdb* geodatabase.

The unzipped geodatabase contains:

Create a table containing the correct distance in KM for the Churchill River by Province

FREQUENCY	NAME	RiverKM
1	Alberta	224.9
2	Manitoba	586.3
3	Saskatchewan	1076.3

Share your arcgis work as a map package. (Arcmap file menu → Share as →)

Include Enterprise Geodatabase data instead of referencing the data

uncheck

In the body of your email,

OUTLINE YOUR CONCEPTUAL SOLUTION STEPS.

Attached your shared map package (.mpk) file when you email me your conceptual solution.
