

Watershed Quiz

Download the winzipped executable file **Watershed_quiz_2018.zip** from the website:
http://dverbyla.net/nrm435/quiz_data_2018/

The unzipped file contains the following GIS layers:

- RichardsonHwy
- Four_Creeks
- Elevation

The four creeks all flow to culverts at the Richardson Highway in the Alaska Range.

All output should be in **Watershed_quiz_2018, not default.gdb**

For each culvert, the likelihood of a flash flood depends in part on the area of the watershed upstream and the steepness of this area.

Create a .dbf table containing the following information:

Creek	Mean Percent Slope	Watershed Hectares
Flood Creek		
Michael Creek		
Trims Creek		
Whistler Creek		

Email me (dverbyla@alaska.edu) your mpk shared map package file.
